# Kentucky Postsecondary Education Data Portal

Special Preview
October 3, 2006

Why do we Need the KPED Portal?
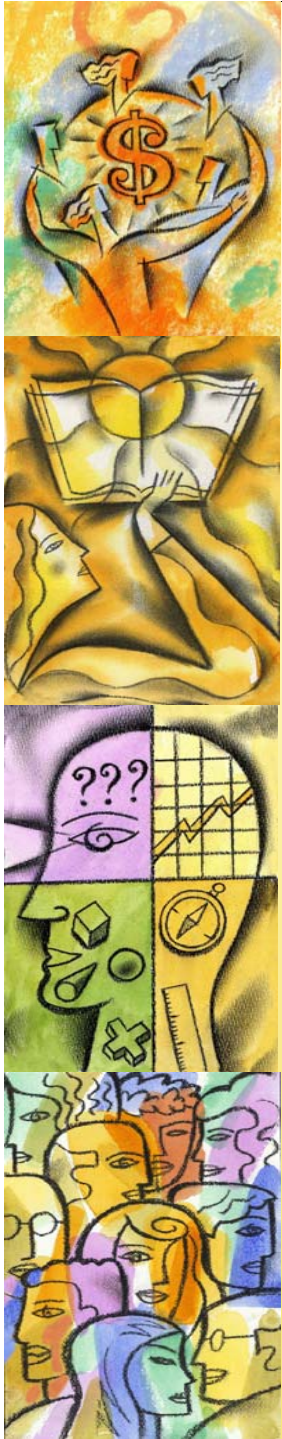

Findings Regarding Transparency and Accountability

There is inadequate transparency and accountability for measuring institutional performance, which is more and more necessary to maintaining public trust in higher education.

A quote from:
A Test of Leadership
Charting the Future of U.S. Higher Education
A Report of the Commission Appointed by Secretary of Education Margaret Spellings

The Kentucky Postsecondary Education Data Portal is…

A one-stop-shop for Kentucky postsecondary education data.

A replacement for the Research and Data section of the CPE web site with a more comprehensive site of tables, graphs, reports, and maps.
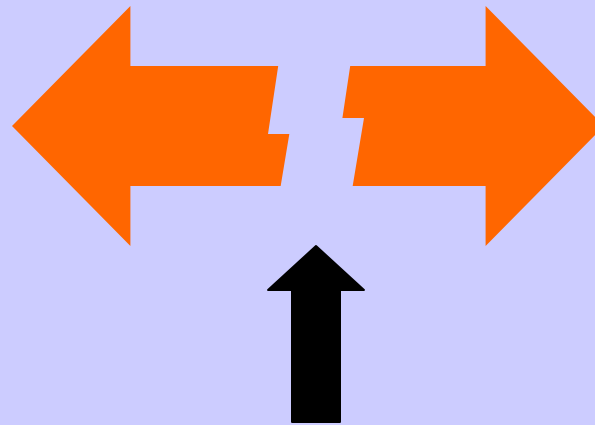

Part of the Council's overall plan to collect and analyze data and make those findings more easily available.

A source of accountability by making information easily available.

What new things are available?

More data is now available to students, parents, and policy makers in easier to understand formats including extensive use of maps and graphs.
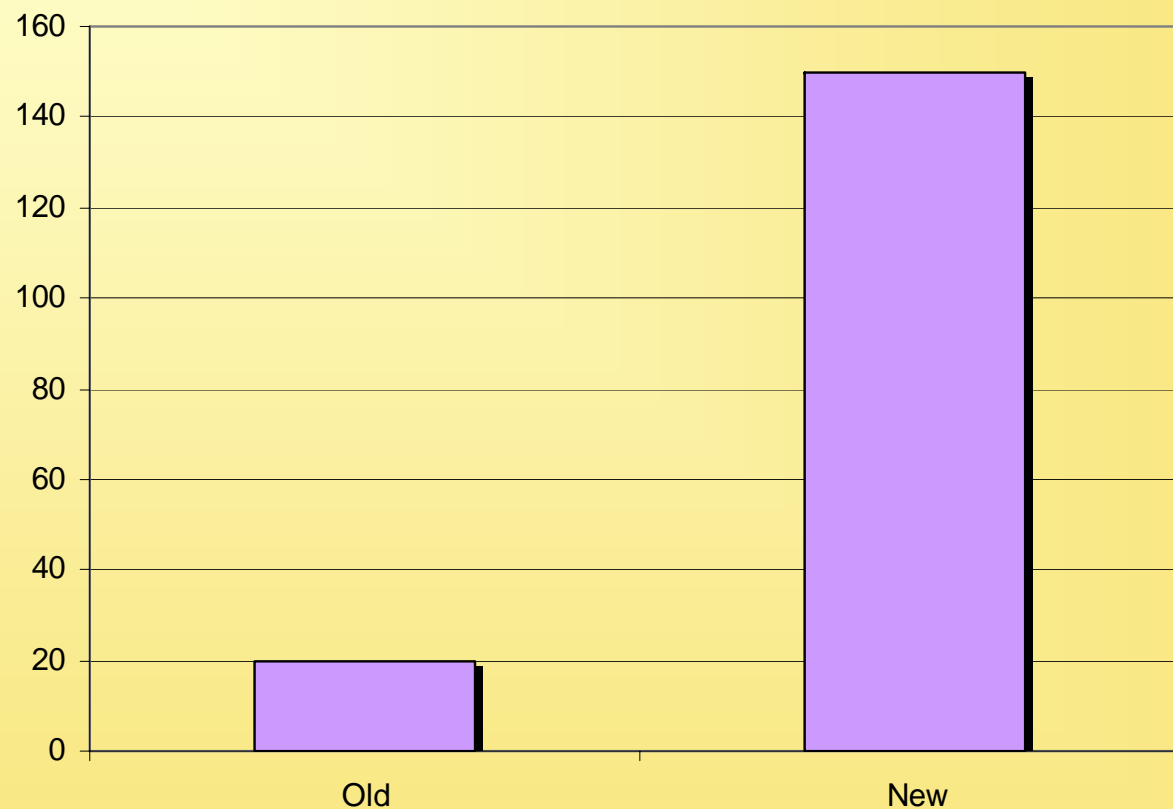

Some of the new reports include information about diversity, measures of student success like graduation and retention rates, and degree production among other things.

Kentucky postsecondary data has never been this accessible or broken out to this level and made publicly available before.
